

### **Bridgeman Modular Case** Safe Deposit **Box Series.** Advanced

construction, improved security.

Today's new standard in safe deposit boxes has been developed by Bridgeman Security Equipment...the innovative company special-izing in institutional security since 1955.

Through the use of rugged aluminum construction and maintenance-free finishes, Bridgeman's modular case safe deposit box series offer attractive, low cost modular construction, and minimal upkeep. Construction

The Bridgeman series of safe deposit boxes combines sturdy aluminum alloy doors and frames with cabinets of rust-resistant steel. For high security, the die-cast doors are engineered with a continuous heavy flange which interlocks with the door jamb. Both attractive finishes provide a virtually maintenance-free vault. The modular cabinets are

dimpled for a positive interlock when stacked in sections, and are designed for easy installation. The Bridgeman series may be installed flush against the vault wall, utilizing every inch of valuable wall space.
